Markbook designer, Year 8 Dylunio a Thechnoleg | Design & Technology [Return to what you were doing](#)

There is no markbook for the subject yet. Do you want to:

Create a **standard** markbook, suitable for KS2, KS3 and most GCSE, AS and A2 subjects.
Each sheet within the markbook contributes, via its weight, to the overall current working grade/level for a student. Sheets can be used to collect either grades or marks.

Create a **Vocational type 1** markbook, suitable for BTEC, Cambridge technical and NCFE VCert qualifications.
Suitable for qualifications with internal and external units. Each sheet within the markbook can be mandatory, optional and/or core and represents a unit that contributes to GLHs. Core assessments in a marksheet must be passed to achieve a pass for the unit, with additional assessments counting towards higher grades e.g. merit. When a student has accrued enough points by passing the units they pass the qualification. Units' points are converted based on the unit GLH to calculate the overall grade achieved.

Create a **Vocational type 2** markbook, suitable for NVQs.
Each marksheet can be mandatory or optional and represents a unit with a credit value. Each assessment represents a skills element of the unit. All assessments in a unit must be passed to pass the unit. When the student has accrued enough credits from one or more units they pass the qualification.

Create an **OCR National-style** markbook, suitable for OCR Nationals.
Each sheet within the markbook can be mandatory or optional and represents a unit that is worth **Guided Learning Hours**. Each assessment within a sheet typically represents an Assessment Objective. A best fit grade is calculated for each unit, but the student must pass all assessments in a unit to pass the unit. When the student has accrued enough GLHs by passing units they pass the qualification. Guided Learning Hours are then converted into points, and the points are used to calculate if the student has achieved a merit etc.

[Create a markbook by copying a markbook from this or an earlier academic year.](#)

Create a markbook by copying a markbook from a **template** created by GO 4 Schools.
A number of markbooks have been created by GO 4 Schools which may help to get you started and / or save you time.

Dewis - Create a markbook by copying a markbook from this or an earlier academic year.
